### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 14 October 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

1. Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

***Election/Restrictions***

2. Newly submitted claims 8-14 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: original claims are directed towards an apparatus claims and the newly submitted claims are directed towards method claims.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 8-14 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Bird 5862802.

5. Bird teaches a ventilator comprising: an inspiratory unit (col. 29, lines 48-62); an expiratory valve 143; a control unit for controlling the inspiratory unit and expiratory

Art Unit: 3761

valve to regulate flow of breathing gas by generating a recruitment phase (col. 2, lines 45-48; col. 3, lines 1-4; col. 4, lines 8-10) with a plurality of breaths superimposed on an elevated basic pressure (col. 1, lines 48-51); wherein the control unit controls the inspiratory unit and expiratory valve to produce elevated basic pressure in a range from 10 to 80 cmH<sub>2</sub>O (col. 75, lines 51-67 through col. 76, lines 1-9); and to generate the superimposed breathes at a pressure range from 1 to 10 cm H<sub>2</sub>O (see figures); and to generate the increased breathing rate in a range from 50-200 breaths/minute (col. 83, lines 14-21); and to generate the recruitment phase for a duration in a range between 10-100 seconds (col. 76, lines 10-12).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bird.

8. Bird teaches the ventilator as claimed in claim 1. It should be noted that Bird fails to teach wherein the control unit controls the inspiratory unit and expiratory valve to set the increased breathing rate as a percentage range between 110% and 1000%.

However, the ventilator of Bird can be programmed to desired parameters. Therefore the ventilator of Bird is fully capable of performing the claimed limitations.

**Conclusion**

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3761

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
